REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record (JP 2001060098, same assignee as current application) teaches a method in which audio information from audio/video source is automatically transferred and a speaker is identified simultaneously by transferring the audio source and also identifying latent segment boundaries and assigning a speaker label to each identified segment by converting an audio signal into text and attaching a speaker label to each identified segment of the voice signal.

The prior art of record, fails to teach a method of providing caller information comprising: receiving a voice signal; detecting portions of the voice signal that are inaudible using a perceptual audio processor; replacing the inaudible portions of the voice signal with digital caller information and transmitting the resulting voice signal specifying the digital caller information as claimed and substantially connected in claims 1-24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
